

n Zymax™

digestive enzyme
full spectrum vegetarian enzyme supplement

- promotes optimal digestion & assimilation of proteins, fats, carbohydrates, fiber & dairy
- provides relief of occasional digestive discomfort
- supports optimal balanced digestion process

Why digestive enzymes?

High stress, fast paced lifestyle factors and modern food processing and cooking, strip foods of their naturally occurring enzymes, and can interfere with proper digestion.

Undigested food may cause digestive discomfort, gas and bloating, and may lead to malabsorption, poor nutrition and compromise our immune systems.

Enzymes turn food into energy, allow us to absorb the nutrients contained in our food and relieve digestive discomfort.

This quality **PhytoCeutical Formulations™** product is thoroughly assayed for purity, potency and consistency. Our Quality Assurance Procedures and Good Manufacturing Practices ensure that each product meets our highest standards. All PhytoCeutical Formulations products are manufactured in a GMP certified facility.

Why nZymax™

digestive enzyme

nZymax™ is a broad spectrum Vegetarian Enzyme complex, offering a more complete spectrum of enzymes in a Microbial Vegetarian Enzyme complex. It is completely vegetarian and cruelty-free. Finally, with nZymax™ you are assured proper digestion and maximum absorption of the nutrients available from your food.

But what good are digestive enzymes if they only break down limited foods and they don't happen to be the ones you are eating? Or, if they only work in a limited pH range, when digestion takes place through many pH ranges. The enzymes in nZymax™ have been specifically selected on the basis of each enzyme's unique characteristics. nZymax™ is active in a wide pH range and is effective in maximizing the body's digestion of a wide variety of food groups, including protein, carbohydrates, fat, fiber and dairy.

nZymax™ provides protein digestion through all portions of the digestive tract, digestion of fats and oils of vegetable and animal origins and can even help properly digest the excessive fat being eaten in today's typical high fat, high carbohydrate diet. nZymax™ also potentiates the complete digestion of carbohydrate rich foods, such as grains and vegetables, including those in the legume and cruciferous families, and the sugars found in milk and dairy products. Even hard to digest foods like broccoli, beans and milk are no match for nZymax™. And, because nZymax™ includes critical enzymes that humans naturally lack, important mineral nutrients and additional sources of nutrition that would otherwise be lost, are available from our food.

Fructooligosaccharides (FOS) have been included to help support the growth of beneficial microorganisms in the intestine. Having a healthy intestinal flora can lead to the improved breakdown of nutrients in the intestine, thus leading to improved digestive efficiency and nutrient availability.

Ginger has also been included to help to soothe and facilitate the digestive process through out its full course. By increasing the flow of saliva, gastric juices, and bile, ginger is able to work synergistically with digestive enzymes to promote proper digestion and reduced gastrointestinal upset.

Supplement Facts

Serving size: 2 capsules
 Servings per container: 45

Amount per serving	%DV
nZymax™ proprietary blend	477 mg *
Carbohydrate digestion blend	288 mg *
Amylase	17,400 DU *
Alpha-galactosidase	300 GalU *
Pectinase	32 endo-PGU *
Lactase	2,000 ALU *
Glucoamylase	18 AGU *
Phytase	16 FTU *
Malt diastase	650 DP* *
Cellulase	220 CU *
Protein digestion blend	171 mg *
Bromelain	1.5 mil FCCPU *
Protease 4.5	25,000 HUT *
Protease 6.0	15,000 HUT *
Protease 3.0	22 SAPU *
Papain	1 mil FCCPU *
Fat digestion blend	18 mg *
Lipase AN	360 FCCLU *
Ginger (<i>Zingiber officinale</i>) rhizome	200 mg *
Fructooligosaccharides (FOS)	200 mg *

*Daily value not established

Other ingredients: Rice bran, vegetable cellulose, water

Directions: Take 1 to 2 capsules directly before meals to aid in digestion.

90 v-caps™

100% Vegetarian
